Interesting Facts about Cinco De Mayo: Saturday May 5th

- The French invaded Mexico in late 1861 with well-armed forces and stormed Veracruz, forcing the Mexican government and its forces to retreat into northern Mexico.
- April 1862 the English and Spanish had withdrawn, but the French, with the support of wealthy landowners, remained in an attempt to establish a monarchy under Maximilian of Austria and to curb U.S. power in North America. On May 5, 1862, a poorly equipped mestizo and Zapotec force under the command of General Ignacio Zaragoza defeated French troops at the Battle of Puebla, southeast of Mexico City; about 1,000 French troops were killed. Although the fighting continued and the French were not driven out for another five years, the victory at Puebla became a symbol of Mexican resistance to foreign domination.
- Not all of Mexico celebrates Cinco de Mayo, typically only the people in Puebla Mexico celebrate, as that's where the unlikely victory occurred, but the festivities aren't nationwide. Cinco de Mayo isn't a federal holiday, so the day is just like any other day for most people in Mexico.

Oil & Gas Sector Facts and Activities for Canada

Canada's oil and gas industry is a global innovator in equipment supporting the exploration, extraction, and processing of hydrocarbon reserves both onshore and offshore. Foreign investors can rely on a robust research and development (R & D) community that includes educational institutions, research institutes, governments and private enterprises.

British Columbia – Natural gas reserves: 35.4 tcf, 49 percent of Canada's total, to date, 19 proposed LNG projects and 10 long-term export licenses granted, Transit time between BC's west coast and the Asian LNG market is 9-10 days

Alberta & Saskatchewan – **Alberta's** oil sands reserve: 168 billion barrels, among the largest in the world, **Alberta's** natural gas reserves: 33.5 tcf, 47 percent of Canada's total, **Saskatchewan's** underdeveloped oil sands potential: one-third of the Bakken oil play

Canada's North – Thirteen percent of the world's undiscovered oil and 30 percent of its undiscovered gas lie under the Arctic seabed – a major investment opportunity for investors interested in Canada, Central Mackenzie Valley: \$500 million in government commitments over the next five years

Ontario & Quebec – **Ontario:** Four refineries with capacity of 396,000 barrels of oil per day, **Quebec:** Two refineries with a total capacity of 402,000 barrels of oil per day

Atlantic Canada – **Nova Scotia:** Sable Offshore Energy producing more than 400 million cubic feet per day of gas. Proposed Goldboro LNG would have an export capacity of 10 million tons per year, **New Brunswick:** Home to Canaport LNG, an LNG regasification terminal with a maximum send-out capacity of 1.2 billion cubic feet of natural gas per day, **Newfoundland and Labrador:** is Canada's offshore oil producing region and accounts for approximately 30 percent of Canada's conventional light crude output. Over the last 18 years Newfoundland and Labrador has produced in excess of 1.5 billion barrels of oil. Hebron, the next field to begin production is forecasting first oil in 2017. Future development is expected, as Statoil's discovery in the Flemish Pass Basin was the largest oil discovery worldwide in 2013
